SKILLS

- Languages: Java, Python
- Technologies: NumPy, Pandas, Matplotlib, TensorFlow, Scikit-Learn
- Tools: GitHub, Google Colab, VS Code
- Soft Skills: Problem-Solving, Adaptability.

TRAINING

- **CIPHER SCHOOLS | CERTIFICATE** Jun' 24- Jul' 24
- Completed an internship on Data Structures and Algorithms (DSA) using C++.
- Developed a project on Binary Search Tree (BST) implementation, focusing on insertion, deletion, and searching.
- Learned key concepts such as linked lists, various sorting techniques, hash tables, and different types of trees

PROJECTS

- **Exercise Form Evaluation Using Pose Estimation|Github** Aug' 25
  Machine Learning
  - **Trained** and fine-tuned a pose-estimation–based exercise form evaluation system using **MediaPipe** to detect body landmarks and monitor joint movements in real time.
  - **Implemented** angle calculation and rule-based validation logic to assess exercise form for movements such as **bicep curls** and **lateral raises**, ensuring accurate posture analysis.
  - **Integrated** real-time visual feedback overlays with a modular Python architecture, supported by sample videos and clear documentation for ease of use and extensibility.

  Tech: Python
- **Image Caption Generator - Flickr Dataset | Github** Mar' 24
  Machine Learning
  - **Developed** an AI-driven image captioning system using CNNs for feature extraction and **LSTMs** for text generation, enabling accurate and meaningful descriptions.
  - Preprocessed image and text data, optimized model performance with **VGG16**, and fine-tuned hyperparameters for improved caption accuracy.
  - Created a real-time AI image caption generator using Flask for instant caption generation from uploaded images.

  Tech: Python
- **Java Expense Tracker |Github** Jun' 24
  - **Deployed** a Java CLI Expense Tracker to record expenses and display them in a clean, menu-driven interface.
  - Used ArrayList to store expense entries and HashMap for fast category-wise total calculation.
  - **Implemented** essential backend logic such as input handling, looping, and data aggregation in Java.
  - Designed the system to be simple, modular, and easily extendable with features like saving data to files.

  Tech: Java

CERTIFICATION

- SAP Certified - Data Analyst - SAP Analytics Cloud | SAP Jan' 26

CERTIFICATES

- Python for Data Science, AI & Development | COURSERA Jan' 26
- Internet Of Things| NPTEL Nov' 25
- large language models | Google cloud Feb' 24
- AI and ML | LinkedIn Feb' 23

EDUCATION

- Lovely Professional University Phagwara, Punjab.
  Bachelor of Technology-Computer Science Engineering: **CGPA: 6.40** 2022.
- Narayana Junior College Hyderabad ,Telangana.
  Intermediate Percentage: 85% 2020- 2022.
- Narayana Co School Hyderabad, Telangana.
  Matriculation Percentage: 100% 2019- 2020.
